Required Crime Log Elements

(The Handbook for Campus Safety and Security Reporting, Chapter 5)

The Daily Crime Log is not intended to be a general, catch-all incident log. Record any crime that occurs on your Clery geography: on-campus, in or on non-campus buildings or property or on public property.

Nature

Brief description of the reported criminal incident. This may be a brief description such as “simple assault,” or a more detailed description such as “simple assault-non-student victim involved in domestic encounter with student offender.” Codes, acronyms or abbreviations will not be used. State crime classifications may be used.

Case Number

Internal tracking number assigned by Campus Security. Use format YY-0000, example: 11-0001.

Date/Time Reported

Date and time that the crime was reported to campus security. A reported crime must be logged regardless of how much time has passed since it occurred. Use date format of DD MMM YY @ HHMM, example: 04 JUN 11 @ 2340

Date/Time Occurred

Date and time that the crime occurred. If the exact date and time are not known, use a range or indicate that it is unknown. Use date format of DD MMM YY and 24 hour time, example: 04 JUN 11 @ 2340 or 04 JUN 11 Btw 0200-0600.

Location

General location of the crime using a description that will mean something to the campus community, such as North Campus Hall rather than “in a dormitory.” However personally identifying information is not used. For example, enter “Fourth Floor, North Campus Hall” rather than “Room 404, North Campus Hall.”

Disposition

Include the current status of each complaint in the log, if known; for example, “pending,” “judicial referral” or “criminal arrest.” Do not delete an entry once it’s been made; update the disposition instead.
