Fall 2019

## PROJECTS IN PROGRESS

We are working on a multitude of projects on the Northwest campus currently, but here are three that we are excited to share with you all! If you would like to find out more information on these projects or more projects we've looked into this semester, please check out our page on Eagle!

### STAPLERS

ASNU is trying to place staplers at all of the print kiosks around campus. We are currently working with IT to see if they would be willing to help sustain the project and brainstorming with them about anti-theft methods to keep the staplers at the kiosks.

### PHONE CHARGERS

We are in the research stages of identifying need for phone charging stations in high foot traffic areas around campus. These would be equipped with multiple types of charging cords to connect with all phone styles. This will most likely include a trial station set up in Pecota in early Spring, so keep an eye out!

### PECOTA RIBBON CUTTING

You're invited to celebrate the refurbishing of furniture in the Pecota Lounge! ASNU is hosting a ribbon cutting ceremony on Monday, January 13th at 3:00 p.m. with cake and apple cider.
